

Metal Art of Wisconsin
Manitowoc, WI

Project data	Type	Qty	Energy per unit
Existing	Incandescent	9	100W
Upgrade	LED High Bay	9	150W

36x light level increase

Foot-candles increased from 1.13 to 41

The objective of Metal Art of Wisconsin was to increase light levels

Metal Art of Wisconsin upgraded the incandescent screw-in bulbs in this storage facility to E-Series LED high bay fixtures. The upgrade was undertaken in preparation of turning the space into a manufacturing and production plant of metal art products.

The project successfully increased foot-candles on the floor from 1.13 to 41, creating an environment with superior visual acuity for the production process.

That's LED Done Right®
