

LED Done Right™

Milwaukee Forge  
Milwaukee, WI

		ANNUAL ENERGY USAGE
project data	existing	649,166 kWh
	upgrade	189,396 kWh
<b>TOTAL ENERGY REDUCTION</b>		<b>459,770 kWh</b>

**71%**  
energy  
reduction

Milwaukee Forge achieved a **71% reduction in energy** throughout their facility by upgrading existing HID, T-12 and T-8 fixtures to energybank LightSource® LED.

The consistent, even quality of the glare-free white light has dramatically improved the appearance of the facility as demonstrated in the Die Shop photos above. LightSource illuminates the entire zonal cavity for enhanced visibility, productivity and safety. The result is a huge improvement with significant energy and maintenance savings over 100,000 hours.

That's LED Done Right.
