reduction

Smart operations. A **65% reduction in energy** was achieved in this loading bay by upgrading existing HID fixtures to energy efficient energybank LED OmegaLight™.

The consistent, even quality of the glare-free white light has dramatically improved the appearance of the space as demonstrated in the photos above. The OmegaLight delivers better quality light for improved visual acuity. The result is a huge improvement in appearance, safety and performance with significant energy and maintenance savings over 100,000 hours.

That's LED Done Right.
