**TOTAL ENERGY REDUCTION: 292W**

**ANNUAL ENERGY REDUCTION: 59%**

*Additional savings in lighting maintenance and repair.*

## 59% energy reduction

These side-by-side conference rooms at Federal Industries clearly demonstrate the beautiful results of LED Done Right. The light within the upgraded conference room (at left) is evenly distributed, crisp and clear with accurate color rendering to accentuate the blues and other hues around the room. Maintenance crews no longer need to change lamps and ballasts in the fixtures, and the new LED fixtures provide a 59% energy reduction over the previously existing fixtures.

Efficient. Sustainable. Good business. That's LED Done Right®.
