Communications & Graphics/Media

Knowing how to write and create clear, effective content is of key importance.

You will often work with the founder and CEO, who is very involved in determining the message and style of energybank communications.

Areas of responsibility will include creation of technical and promotional materials, website and interactive content development. Compensation will be based on skill set and experience.

The ideal candidate will know how to use these programs and platforms:

1. Adobe Creative Suite
 - a. InDesign
 - b. Illustrator
 - c. Photoshop
 - d. Premier
2. Microsoft
 - a. Word
 - b. PowerPoint
 - c. Excel
3. WordPress
4. Social Media Platforms

This a great opportunity to join our team of highly motivated people that are dedicated to making a change in the world's energy use.

energybank is creating a whole new segment in the solar photovoltaic market as a distributed energy resource. Our innovative FUSION™ solar powered LED technology is meant to be implemented at the point of use – not in large, concentrated megafarms. energybank also manufactures innovative, high-performance LED lighting products and IoT technology.
